**Subject:** Political Pressure to Repudiate NOAA Tweet

Dear Dr. Jacobs,

This is a dark day for NOAA and I sincerely hope the person or persons who decided to send out the statement repudiating the Birmingham tweet will resign or be fired. It's outrageous that they would do such a thing. The American people deserve the facts about weather conditions and possible threats from hurricanes. To cave in to this ridiculous president is beneath the dignity of the organization. The hardworking men and women of NOAA and the American people deserve better!

Shame on you if you don't take action!
